

Bulk Depalletizer

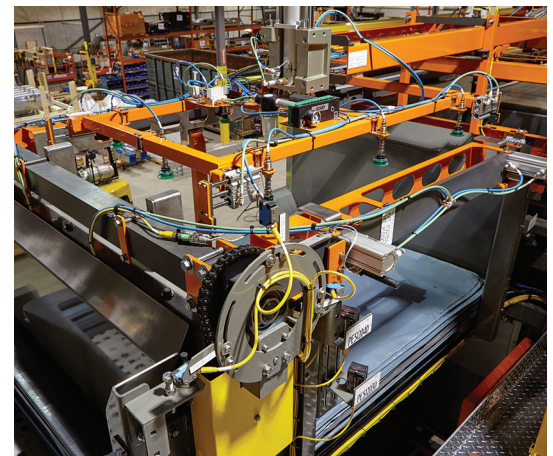

Designed to Impress

Designed to outlast, outrun,
and outperform. Period.

MAIN FEATURES

- No operator. Fully automatic capable
- 360° pallet containment
- Automatic tier sheet and top frame removal and separation
- Unique tier sheet vacuum system
- Servo motor control
- Gentle layer compression during sweep
- Integrated light curtain Cat 3 safety circuit

OUTLAST

Our equipment is built strong. It is expected to take a beating and it is built accordingly.

- Heavy gauge formed channel and welded tubular construction
- Formed sheet metal panels
- Professional powder coated painted finish
- Fully guided main hoist with 4-point #80 chain transmission
- Linear guided sweep carriage with timing belt drive assembly

OUTRUN

Throughput is optimized via the use of integrated controls and intelligent software.

- Servo motor control provides high-speed hoist and sweep functionality with finite position control
- Position monitoring allows for simultaneous action of multiple devices. Dwell time is minimized
- Intelligent software ensures repeatable performance

OUTPERFORM

Operator free capable. Stand-alone or fully integrated, this stuff has to work day in and day out.

- Automatic strap removal
- Automatic pallet and dunnage handling
- Modular belt main bed with integrated dynamic transfer
- Fully integrated empty container conveyance system
- Easy to navigate graphical operator interface with diagnostic capabilities
